

## A SIMPLE AND ECONOMIC SOLUTION FOR RECYCLING YOUR USED SHOT BLASTING BEADS.

### ZIRCON-BASED CERAMIC BEADS

All shot blasting systems use Zircon-based ceramic beads, and are used for different applications :  
*Metal treatment : Automotive and Aeronautical industries.*  
*Cleaning : Paint stripping and degreasing of glass moulds.*

Once used, the beads are contaminated with metallic particles and need to be buried in specialized landfill sites.

### OUR SERVICES

Valoref has developed a specific recycling service for these waste products.

**A simplified procedure** : Once you send us a sample of your used ceramic beads, we will carry out a free analysis and open a Certificate of Acceptance for you. We will take charge of all the administrative work and authorizations, and deliver you with the recycling certificate at the end of the operation.

We work with registered waste carriers to evacuate your waste.

### OUR RECYCLING UNIT

Our recycling unit, **unique in the world**, allows us to treat up to 200 Tons per month. Our recycling rate exceeds 90%.  
The recycled part of the material is put back into the refractory industry, and the residual waste is treated by us.

We accept all types of packaging : Big-Bags, barrels, drums.

**We also treat** : Corundum, Alumina... Contact us for all your needs.

### VALOREF'S ASSETS

We provide an economic recycling solution.

**We are 100% compliant** with current European environmental and safety regulations.

We are European leaders of refractory revalorization in the glass industry.

We can simplify all of your administrative documents and procedures.

### **A dynamic team at your disposal,**
